SELECTED PROJECTS

PERSONAL DEVELOPER PORTFOLIO

Developed a responsive personal portfolio featuring reusable components, project filtering, a contact form, responsive layouts, and an AI-powered portfolio assistant. Built an Express.js backend with OpenAI API integration and a controlled portfolio knowledge base, enabling the assistant to answer visitor questions about professional skills, experience, services, and projects. Technology: React.js, Vite, CSS, Express.js and OpenAI API

Portfolio link: portfolio.example.com

CONSIDRACARE

Contributed to responsive page development, interface implementation, layout refinement, and ongoing website improvements for healthcare and SaaS-focused websites. Technology: WordPress, Elementor and Responsive UI

THEMEFOREST COMMERCIAL THEMES

Contributed to multiple commercial WordPress themes published under Evonicmedia, including responsive layouts, reusable components, theme customization, and marketplace-ready website experiences. Technology: WordPress, Elementor, HTML, CSS and JavaScript

AI & WEBSITE AUTOMATION CAPABILITIES

- Create custom Codex skills for repeatable web-development tasks and structured workflows.
- Connect AI tools, development environments, and external services through MCP servers and APIs.
- Build AI-powered website assistants with controlled knowledge bases and server-side integrations.
- Automate repetitive website processes, including content workflows, forms, lead handling, testing, debugging, reporting, and maintenance support.
- Use Codex and Claude AI for component development, issue identification, code assistance, and workflow optimization.
- Design practical end-to-end website automation while maintaining security, quality control, and human review.

PROFESSIONAL HIGHLIGHTS

- Experience across healthcare, SaaS, e-commerce, hosting, and corporate website projects.
- Contributed to commercially published WordPress themes on ThemeForest.
- Built a React-based portfolio with an AI assistant and secure server-side OpenAI integration.
- Combines WordPress development with Codex, MCP servers, Claude AI, and workflow automation.
